

DURIBLAND

Indicated for:

Cuticle remover. Hand and foot care.

Softening agent for hard skin sections. For external application only.

Product codes:

03 200 200 ml.

03 300 500 ml.

03 430 35 ml.

Description of product:

Water-based solution. Yellowish in color.

Benefits:

Allows for fast and easy removal of hard skin sections without cutting or filing.

Effective and painless treatment. Risk-free for diabetic persons.

Ingredients:

Aqua, Potassium Hydroxide, Guanidine HCL, 2,3 Dihydroxy-1,4 Butandithiol (DTT), CI 45350.

INSTRUCTIONS FOR USE

To remove sections of cuticle:

Place a piece of dry cotton wool to cover sections of cuticle and hard areas of skin around the nails. Allow DURIBLAND to drip until cotton is fully soaked and cannot absorb any more. According to thickness of hard section, leave in contact for 3 to 5 min. Lift the cotton wool and immediately apply friction to the softened cuticle and hard sections by sweeping with the spatula supplied, or with an orange-wood stick. For a perfect finish, brush the treated zone with a dry nailbrush. Rinse with plenty of water. Dry and apply nutritive cream, massaging gently.

For removing hard skin:

Cover hard skin area with a layer of dry cotton wool. Allow DURIBLAND to drip until cotton is fully soaked and cannot absorb any more. Allow it to work for about 10 min., adding drops of DURIBLAND from time to time during the process so as to guarantee that contact area is always soaked. Remove cotton wool and immediately place DURIBLAND spatula perpendicularly to skin. Applying pressure, scrape over the area to remove the now-softened skin. Repeat scraping process as often as necessary to remove all the hard skin down to desired level. The same piece of cotton wool can be dampened and used again. At this point, to obtain a perfect finish, brush vigorously over the treated area with a dry nailbrush. Rinse with plenty of water, dry well, and apply nutritive cream by massaging gently. **This product should not be used on facial areas, delicate skin areas, or open wounds.**

Alternative uses:

There are none.

Precautions:

Alkaline substance. Avoid contact with eyes. Danger of blindness. Keep out of reach and sight of children.

Note:

The above data is also indicated on the bottle of product. And with the references 03 200 y 03 430, of which the bottles are boxed, inside is included a flyer with additional data and step-by-step photos of use in various languages.
